PROFESSIONAL SUMMARY

Frontend Developer with a strong design sense and expertise in React, TypeScript, and Tailwind CSS. Experienced in building responsive, accessible interfaces and integrating backend services like Supabase and Firebase. Delivers clean, maintainable code with a focus on performance and user experience.

SKILLS

Frontend: HTML5, CSS3, TailwindCss, JavaScript, TypeScript, React.js, Next.js, Framer Motion

Backend: Basic Node.js, Firebase, Supabase

Tools: Git, Github, Vercel, Netlify

PROJECTS EXPERIENCE

ScrollJs | [Github Link](#)

Sole Developer & Open Source Maintainer | 02/2025 – Present

- Built a lightweight JavaScript library for scroll-triggered animations using the Intersection Observer API.
- Supports both built-in and custom animations, custom configurations and one-time animation with zero dependencies.
- Published as open source with clean API and full documentation.

MindEcho | [Github Link](#)

Sole Developer | 11/2024 – 12/2024

- Developed a mental health app with mood logging, AI therapist, and personalized tips using JavaScript and Firebase.
- Implemented mood analysis, soundscapes, and real-time data sync across authenticated users.

Postmorph | [Github Link](#)

Founder & Developer | 06/2025 – Present

- Created a content repurposing SaaS with NextJs, Typescript and Supabase that transforms YouTube links, Reels, or blog posts into tweets, threads, or LinkedIn posts and more...
- Supports multiple tone presets (e.g., formal, casual), custom tones and automated multi-format content generation.

HONORS & AWARDS

- Next Step Winner – Student Hacks Hackathon: Issued by Devpost for building Summify, an AI tool that simplifies dense content (Oct 2024)
